

PATIENT DESIGN LENSES

Unique problem, unique solution!

Designing and manufacturing special iris reconstruction implants for cases in which standard Iris Reconstruction Implants do not apply. Patient Design IOLs are developed in close cooperation with the surgeon to provide a unique problem solving solution.

Main Features & Benefits

- ✓ RESTORES IRIS DIAPHRAGM
- ✓ SOLVES PHOTOPHOBIA
- ✓ COSMETIC IMPROVEMENT
- ✓ 100% SURGEON DESIGN

Colours

Ophtec's Iris Reconstruction Implants are available in black, brown, green and blue. These colours have been carefully chosen to simulate the natural colouring of most eyes.

Colour specifications of the Iris Reconstruction Implants

Warning: 1. The Anterior Segment Reconstruction Prostheses are only available in 3 standard colours and therefore OPHTEC cannot guarantee the perfect colour match with the fellow eye; 2. After implantation in the eye the colour of the prosthesis might look lighter; 3. For a better evaluation and choice of the colour match, we suggest you to consult OPHTEC representatives; 4. Black Polycarbonate is more fragile than other (PMMA) colours.
